MODFLOW, PEST, and All the Rest

2 – 6 August 2027

Join us in Golden at the Colorado School of Mines for a conference dedicated to applied groundwater modeling. The conference includes free access to 2 days of hands-on, interactive workshops and 3 days of conference-style presentations.

Topics Include: Groundwater modeling to support mining; Tips and tricks for MODFLOW, PEST, and other codes; Applied transport modeling including PFAS; Coupling watershed models to groundwater flow models on time and under budget; Agentic coding for groundwater modeling - successes and failures; Statistical emulators - do they actually work? Reduced-order modeling; Time-series modeling; Modeling and estimating recharge; Analysis of safe yield; and many more!

Tentative workshops: GW Vistas 10, Applied transport modeling, TimFlow, Pastas, MODFLOW-6, PEST++
